**Case Study: Continuous Professional Development**

**Teacher – Gwenallt Jones**

**Current Teaching – A Level Maths and Further Maths**

**CPD attended:**

**In-school bespoke courses for A level Maths Unit 2 and Unit 4 Statistics**

**Reasons for participating in Further Maths Continuous Professional Development:**

I attended to ensure I had the correct knowledge and understanding of the new syllabus provided to enable me to teach the syllabus for my new role in a new school. I wanted to gain an understanding and knowledge of the new syllabus provided by CBAC.

**Experience of the Further Mathematics Professional Development?**

The sessions were very beneficial and a good support throughout. I feel confident in teaching the statistics units and gaining the resources required to teach the syllabus and whole content. The discussions and time spend on certain units were very helpful. I would very much recommend the course to others. I want to participate in further courses when the need arises and in relation to Mathematics teaching of key stage 5.
