

Case Study	Monmouth Comprehensive School
Address	Old Dixton Rd, Monmouth NP25 3YT

**Case Study: Professional Learning**  
**Teacher – Tara Bullas, Monmouth Comprehensive School**  
**Currently offering – A Level Maths and Further Maths**

**Professional Learning attended:**  
 Further Maths Unit 1 and Further Maths Unit 2

**Reasons for participating in Further Maths Continuous Professional Development:**  
 To extend my knowledge of course and content of A-level Further Maths so that I will be able to teach the modules.

**Experience of the Further Mathematics Professional Development?**

The courses were very useful. The resources were good and gave a full overview of what students need to cover whilst studying the A-level. The course also provided good practice for myself to test my knowledge of the subject and to re-learn some of the topics that I have not covered in some time.

Attending the course will allow me to have more flexibility in writing the A-level Mathematics and Further Mathematics timetables. I will now be able to teach some of the further Mathematics modules myself.

After attending these courses I now feel far more confident and knowledgeable about the topics in FMU1 and FMU2, and feel I can now teach the subject.

I am looking forward to attending the Further Mathematics Unit 3 course this year, and would recommend that other teacher’s attend professional learning session with FMSPWales.
