

		
Case Study	Cowbridge Comprehensive School	
Address	Aberthin Road, Cowbridge CF71 7EN	
<p><b>Case Study: Professional learning – Geogebra Workshop</b>  <b>Teacher – Jenitta Sage</b>  <b>Currently offering – A Level Maths and Further Maths</b></p>		
<p><b>Professional Learning attended:</b>  One day Geogebra Workshop.</p>		
<p><b>Reasons for participating in Further Maths Professional Learning:</b>  I attended the Geogebra workshop to further my own professional development.  I also wanted to be able to further the use of Geogebra in A-level and GCSE Mathematics classes at Cowbridge Comprehensive School and increase my own confidence in using Geogebra.</p>		
<p><b>Experience of the Further Mathematics Professional Learning?</b></p> <p>I found the workshop very good, very informative and useful.  Since attending the workshop I have been able to use the materials provided at the session with other teacher's at my school in order to share good practices in the school's Mathematics department.  As a result of attending, Cowbridge Comprehensive School have now added Geogebra to their scheme of work.  The workshop met all of my expectations and has enabled me to enhance my teaching of A-level Maths and Further Maths, and to help other teacher's at Cowbridge Comprehensive school use Geogebra within their classes.</p>
