

Case Study – Transition to University

Name Gillian Coleman
School Ysgol Y Creuddyn
University Lancaster University
Studying BSc Mathematics with Statistics

What happened after you passed your Further Maths exam?

I took Maths, Further Maths, IT and Welsh Baccalaureate and my results were AABA, respectively.

Do you think that studying Further Maths through FMSP Wales has helped your transition to University?

Further Maths has certainly helped for this last term, would be lost without it.

Are there any ways that you feel Further Maths specifically helped?

Almost all the further Calculus as well as the further trigonometry, hyperbolics etc.

Would you recommend studying Further Maths and why?

I would recommend it to people seriously considering doing Maths at university. Because it makes the transition to university easier, also the grades tend to be lowered if you have Further Maths.

I enjoyed the opportunity to solve (more) maths problems
