Case Study:

Student – Joseph McCambridge

Further Maths Course:

I decided to take Further Maths, as I am very interested in Mathematics and so wanted to further my knowledge by taking the course. I took the course with the Further Mathematics Support Programme, as Further Pure Mathematics 2 was not an option for me to take in my school.

The Further Maths course has helped me to understand more complicated Mathematics which will also hopefully help me in my University life. I have decided to study Maths and Physics in University and hope that this course will help me in my work there.

I found the online lessons easy to access and it was an interesting new way of learning. It is very different to my normal A-level classes but still a very good and useful experience.

Benefits of Studying Further Mathematics?

I really enjoyed the course as I find Maths a very interesting subject and was very glad that I was able to learn more complicated Mathematics from this course. I would highly recommend this course to anyone who is thinking of taking Maths on at University.
