

Current Student Case Study

Student name:
Peredur Morgan

School:
Penweddig

School Address

Llanbadarn Road, Aberystwyth SY23 3QN

Background- provide a bit of background regarding the student.

Year 13 student studying Maths, Physics, History, Welsh Bacc in School. Studying Further maths with FMSP and self-studying Economics.

How did you end up taking Further Maths through FMSP Wales?

My school didn't offer Further Maths, so it gave people the chance to take Further Maths via FMSP.

How was the tuition delivered?

Tuition was delivered by textbooks, online resources (Integral), online learning (Adobe), and lessons at the local university.

What key skills do you think studying Further Maths has given you?

Further Maths gave me independent study skills. It also gave me resilience, because the work is often difficult. I gained quantitative skills as a result of the Further Maths A-level.

Would you encourage others to study Further Maths?

If they are looking to study a degree with A-level maths as a requirement, then yes, because Further Maths is an added advantage. If they dislike GCSE/AS Maths, no, they would likely only find further maths worse, and struggle with it.
